

C++ Software Engineer

Job Description:

Visible World, a ground-breaking video advertising technology company, is looking for a talented, experienced, and versatile C++ software engineer to work in our Manhattan office. We are looking for a self-starter accustomed to working in a dynamic atmosphere creating complex, cutting-edge technology.

Requirements:

- BS or equivalent in Computer Science or related discipline
- Excellent coder with 5-10 years of experience in C++ programming using Microsoft Visual Studio 2003 or higher
- Extensive experience with SQL on MS-SQL Server 2005 or higher
- Extensive XML experience
- Extensive experience with the Windows (Win32) API and SDKs
- Hands-on self-starter capable of working in a fast-paced and highly dynamic agile environment - results-oriented
- Must have worked in medium to large projects and development teams
- Team player with excellent communication skills

Responsibilities:

- Extend and improve our scalable ad processing and delivery software systems, initially focusing on control and workflow, requiring extensive interaction with databases and XML files
- End-to-end system integration with other software engineers
- Working in a small, focused, and highly results driven engineering team

Pluses:

- Experience with other programming languages, notably C#
- Experience with digital media (audio/video) processing
- Experience with networking protocols (TCP/IP, Sockets, HTTP,...)

Education:

- Bachelor's Degree in CIS/MIS, Computer Science or related field

Please **only** reply if you meet **all** the above requirements. Coding skills will be examined through a series of tests.
